# Change the server settings in Thunderbird

Please **rightclick** your mail account (see screenshot: 1) and click on "Einstellungen"/"preferences", the settings windows opens.

In this window please click on "server settings" and rename the entry to: imap.leibniz-zmt.de (see screenshot: 2).

Also rename the outgoing server in the settings window, to do so please click on outgoing server, (make sure your mail account is selected) and click "edit" (see screenshot: 3).
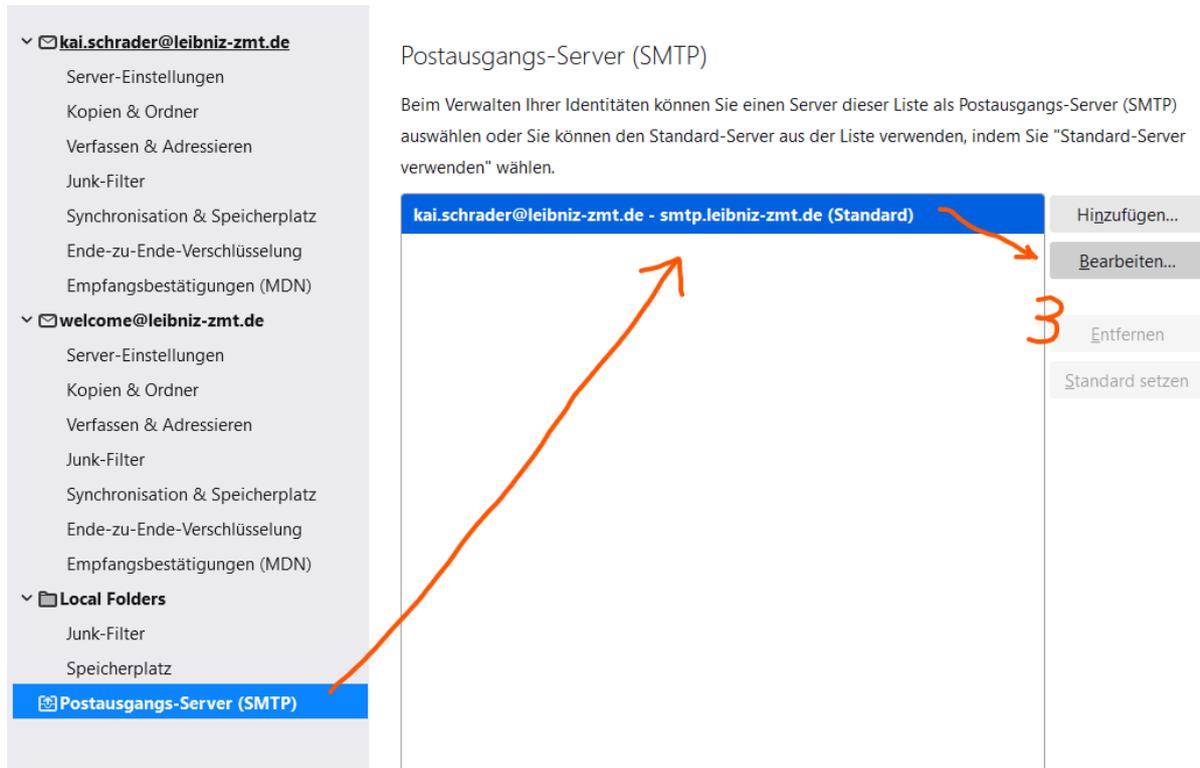

In the popup please edit the field "Server:" to:
smtp.leibniz-zmt.de (see screenshot: 4).
